Release 23.4.0

 Date: October 2024

Task

DMW-4989 CORE: send cartridge version in SendCartV2

DMW-4891 CORE: JWT Authorization for GE APIs

New Feature

DMW-4384 CORE:SFRA:SGJC: Implement support of the Global-e integration for SFCC Commerce API (OCAPI, SCAPI)

DMW-3932 CORE:SFRA:SGJC: Pay By Link orders

Bug

DMW-4711 CORE: Mixed promotion issues

Release 23.3.0

 Date: August 2024

Task

DMW-3882 CORE: Add and use a new session attribute "gePriceStrategy" instead of "geSupportsFixedPrices"

DMW-3895 CORE: Use getUrlParametersValue function for UrlParameters

DMW-3941 CORE: SFCC job "GlobaleCatalogFeed". Refactor and add possibility to split generated catalog data into multiple separate files.

DMW-4029 CORE: fixed Price Books cache

DMW-4053 CORE: Remove setting the attributes configured in preference 'geMetadataCustomAttributes' on generate basket from payload

DMW-4090 CORE: Refactoring of the keeping of the order/product/price adjustment custom data for SFCC GE orders

DMW-4203 CORE:SFRA:SGJC: SendCart. Add SFCC custom hooks for 'HubId' property

DMW-4487 CORE:SFRA:SGJC: Add possibility to manage/modify the location redirect URL via the Global-e Skin

DMW-4593 SFRA: Support custom tax jurisdiction with old version of SFRA

New Feature

DMW-4133 CORE:SFRA:SGJC: release stock reservation after payment failure

Bug

DMW-3802 CORE: Amount off discount.

DMW-3931 CORE: fixed price 0 promo issue.

DMW-3946 CORE: Incorrect discount with combination of promotions.

DMW-4030 CORE: amount related price adjustments.

DMW-4031 CORE: order duplicates.

DMW-4089 CORE: Mixed Orders. SOTM request. Fix the issue when is sent the same value of "MerchantOrderId" for main and sub orders.

DMW-4191 CORE: Negative value in promotion price (Discount type: Amount).

DMW-4206 CORE: International price is converted ignoring rounding rules.

DMW-4259 CORE:SFRA:SGJC: OrderMgr search. SFCC quota violation.

DMW-4270 CORE: Promotional price is not shown on PLP/PDP if fixed country is selected but price is taken from base price book.

DMW-4312 CORE: Fixed price strategy - wrong amount discount total price calculation.

DMW-4560 CORE: Set order custom attribute 'geOrderType' as non mandatory.

DMW-4716 CORE: SFCC job "GlobaleCatalogFeed". Tax Rate calculation issue.

Release 23.2.0

 Date: March 2024

Task

DMW-3662 CORE:SFRA:SGJC: Klarna OSM

DMW-3663 CORE:SFRA:SGJC: Global-e OCAPI requests. Refactoring.

DMW-3684 CORE: Mixed Orders. SOTM request. Ignore 'MerchantOrderId' value for sub orders.

DMW-3688 CORE: WebStore Validation

DMW-3725 CORE: Use ProductCode from Metadata if MAS UseProductCodeSecondaryInFulfilment is enabled

DMW-3727 CORE: Update order status. Refactoring.

DMW-3804 CORE:SFRA:SGJC: Location redirect. Replace AJAX approach on backend redirect.

DMW-3839 CORE:SFRA: localized address in MyAccount

DMW-3867 CORE:SFRA:SGJC: Price conversion on client side/storefront. Refactoring.

DMW-3924 CORE: Refactoring the logic that sets payment instruments in SFCC order

New Feature

DMW-3669 CORE: product localized data

Bug

DMW-3666 CORE: multiple discounts calculation issue

DMW-3841 CORE: SendCart request is broken for product without tax class

DMW-3864 CORE:SFRA:SGJC: Global-e country switcher is shown automatically even if configuration doesn't exist.

DMW-3971 CORE:SFRA:SGJC: The category page is not displayed if is selected fixed country but applicable price books don't exist

DMW-4040 CORE: Product GE VAT rate is not taken into account for calculation of the converted price

Improvement

DMW-3676 CORE: cart hash validation

DMW-3800 CORE: product restrictions

Release 23.1.0

 Date: November 2023

Task

DMW-3506 CORE: define shipping country using SFCC locale

DMW-3544 CORE: GlobaleOrderNotifications Job - process error in the service result response

DMW-3547 CORE:SFRA:SGJC: JWT Auth S2S requests refactoring

DMW-3557 CORE:SFRA:SGJC: Extend the list of SFCC custom hooks

DMW-3585 CORE: Refactor the response format of failed order creation case

DMW-3620 CORE: Gift cards. Refactoring of the response generation.

Bug

DMW-3504 CORE: SendCart incorrect VATRateTypeCode

DMW-3505 CORE:SFRA:SGJC: fixed price coupon code remove

DMW-3508 CORE: OrderCreateV2 - "Set default shipping method" issue if more than 1 reconciliation currency is on a site

DMW-3517 CORE: Create Order Refund and Update Order Status jobs URL issue

DMW-3532 CORE: Promotional price is not shown on PDP/PLP if fixed country is selected but any base price book was not assigned to the site.

DMW-3596 CORE: Product line items attributes are not filled if the order is created from the new basket and preference 'geMetadataCustomAttributes' contains the needed configuration

DMW-3598 SFRA:SGJC: missed "allowedCurrencies" parameter in the geScriptLoaderData

Release 23.0.0

 Date: September 2023

Improvement

DMW-1999 CORE:SFRA:SGJC: Mixed Orders

Release 22.0.3

 Date: August 2023

Task

DMW-3238 CORE:SFRA:SGJC: merchant GUID validation

DMW-3423 CORE: remove "gePromotion" promotion custom attribute

Improvement

DMW-3139 CORE:SFRA:SGJC scripts refactoring

DMW-3381 CORE: services improvements

DMW-3412 CORE: cache price books configuration

New Feature

DMW-3116 CORE: Ability to specify free shipping method

DMW-3269 CORE: Gift Wrapping at checkout level

Bug

DMW-3155 CORE:SFRA:SGJC: N/A order total

DMW-3156 CORE: incorrect order discount value

DMW-3162 SFRA:SGJC: GE post messages handler

DMW-3382 CORE:SFRA:SGJC: Fix functionality of tracking numbers in SFRA/SiteGenesis architectures.

DMW-3383 CORE: Customer Email is not set into SFCC order.

DMW-3397 CORE:SFRA:SGJC: Add functionality of supporting price sorting/price refinements by fixed price books definitions

DMW-3402 CORE: ProductSet price is "N/A" on a PDP

DMW-3403 CORE:SFRA:SGJC: Zero prices are shown on PLP/PDP when fixed country and product promotions applied.

DMW-3434 CORE: Add additional validation of "UrlParameters", "Attributes" properties of SOTM request.

DMW-3439 CORE: Boolean string setting value fix

Release 22.0.2

 Date: June 2023

Task

DMW-2911 CORE: Keeping of the order/product/price adjustment custom data for SFCC GE orders

DMW-2929 CORE:SFRA:SGJC: [Customer Registration on Confirmation page] Save Salutation value to customer profile

DMW-2993 CORE: Update the logic when SFCC order is FAILED/CANCELLED via Global-e notification

DMW-2995 CORE:SFRA:SGJC: Update the logic of Global-e country switcher and preselect always allowed country on the backend.

DMW-2996 SFRA: Remove setting of GE shipping method in Cart.js

DMW-3021 CORE:SFRA:SGJC: SendCart tax rates

DMW-3029 CORE: SFCC job "GlobaleRestrictedItemsFeed". Fix the Upload step.

DMW-3093 CORE: SendCart - support excluded products for order level promotions

DMW-3094 CORE: use request domain for OCAPI calls

DMW-3095 CORE: coupon code refactoring

DMW-3112 CORE: shipping address update

DMW-3113 CORE: Refactoring of handling product's restrictions on the storefront.

New Feature

DMW-2904 CORE:SFRA:SGJC: native Gift Certificates

Bug

DMW-2908 CORE: product amount off promotional price issue

DMW-2973 CORE: Generating of the SFCC basket on SOTM request is failed for Option Products

DMW-2988 CORE:SFRA:SGJC: OCAPI OrderCreate - set request locale

DMW-3014 CORE: Basket validation. Skip option and bundled products if Order Creation is failed

DMW-3085 CORE: GLOBALE_COUNTRIES DefaultVATRateType issue

DMW-3198 SFRA:SGJC: free shipping issue

Release 22.0.1

 Date: March 2023

Task

DMW-2318 CORE:SFRA:SGJC: package.json update

DMW-2644 CORE: SOTM save "OrderCreationSource" on order level

DMW-2689 CORE:SFRA:SGJC: Adding cookies data into cart data (SendCart, SOTM)

DMW-2720 CORE: AllowMailsFromMerchant and AllowDirectCommunicationFromMerchant indication (SendCart, SOTM)

DMW-2724 SFRA:SGJC: product option promotion issue

DMW-2727 CORE: remove RefArchGlobalMetadata.zip

DMW-2729 CORE: remove "geStoreJson" custom site preference

DMW-2741 CORE: Update the list of allowed jobs to run in 'GlobaleDiagnosis-RunJob' endpoint

DMW-2767 CORE: customer registration component

DMW-2770 CORE:SFRA:SGJC: "Globale-KeepAlive" call. Remove unused logic from the code.

DMW-2809 CORE: catalog feed multiple SFTP destinations

DMW-2833 CORE: Add invoking of SFCC custom hook when is generated new basket(on SOTM request)

DMW-2899 CORE: add product "IsBackordered" custom hook

DMW-2832 CORE:SFRA:SGJC: GetCartToken custom endpoint

Bug

DMW-2742 CORE: 'GlobaleDiagnosis-GetSendCartData' returns error instead of valid response

DMW-2812 CORE: countries SFCC custom cache timeout

DMW-2854 CORE: skip order creation with wrong order number

DMW-2891 SFRA:SGJC: Item level promotion doesn't work for countries with fixed prices

DMW-2439 Order level percentage promotion affecting discount when excluded product is removed or added.

Release 22.0.0

 Date: February 2023

Improvement

DMW-2541 CORE: dummy price books caching approach

New Feature

DMW-1963 CORE: server-to-server order create request

Release 21.0.4

 Date: December 2022

Bug

- DMW-2527 CORE:SFRA:SGJC: Global-e "Popups" cartridges. Issues in Globale.js
- DMW-2576 CORE:SFRA:SGJC: Order Details page issues (sub total, duties and taxes)
- DMW-2586 CORE:SFRA:SGJC: Add supporting of discount type "Percent Off Product Options"
- DMW-2590 CORE:SFRA:SGJC: Refactor the logic for price conversion on client side
- DMW-2632 CORE: SOTM CartHash validation fix for Option Product

Improvement

- DMW-2378 CORE: merchant account specific fixed price books
- DMW-2531 CORE: GlobaleOrderNotifications job improvements
- DMW-2534 CORE:SFRA:SGJC: implement products availability validation before the checkout

New Feature

- DMW-2569 CORE: implement OrderDetails API helper

Task

- DMW-2529 CORE: remove geGenerateMerchantOrderId
- DMW-2530 CORE: move site preferences to GE MAS
- DMW-2533 CORE: remove JSON payloads on order level
- DMW-2539 CORE:SFRA:SGJC: Use default tax class if to product is assigned not valid tax class
- DMW-2542 CORE: Add additional checking of GE order number for input Global-e requests
- DMW-2550 CORE: Update getting of Categories information in GlobaleCatalogFeed and SendCart
- DMW-2552 CORE:SFRA:SGJC: Extend Global-e Script loader data and add there info about site and geolocation country
- DMW-2555 CORE: Extend response of "ValidateCart" according to "Validate Cart improvements"
- DMW-2563 CORE: currency mapping for fixed price countries
- DMW-2645 CORE:SFRA:SGJC: calculate.js improvements

Release 21.0.3

 Date: October 2022

Bug

DMW-2523 CORE: 'GlobaleCatalogFeed' job. "Weight" field - not used fallback for incorrect result

DMW-2488 SFRA: strike-through price on the cart page

DMW-2457 CORE: validate cart crypto

DMW-2456 CORE:SFRA: Zero product option price with a fixed pricing

DMW-2442 CORE: store JSON payloads quota violation

DMW-2430 SFRA: PLP product promotional price

DMW-2393 CORE: Product level promotion with percentage discount type. Wrong price of a product line item

Improvement

DMW-2444 CORE: SFCC jobs improvements

Task

DMW-2491 CORE:SFRA:SGJC: move all custom hook handlers from the CORE cartridge

DMW-2472 CORE: Remove file header from restriction feed

DMW-2443 CORE: SOTM CartHash validation

DMW-2425 CORE: Generate "pretty" AddressBookName for saved addresses on the Global-e checkout page

DMW-2415 CORE: Update the documentation of SFCC job 'GlobaleCatalogFeed'

DMW-2413 CORE: 'Globale-RunJob' endpoint. Add 'GlobaleRestrictedItemsFeed' to the list of allowed jobs to run

DMW-2405 CORE: language switcher configuration

DMW-2396 CORE: Make configurable the option to create new addresses from GE checkout on the SFCC side.

DMW-2394 CORE: SOTM payload contains the 'metadata' attributes with the different types that are sent in SendCart request.

DMW-2350 CORE: improve CountrySwitcher logic

DMW-2330 CORE:SFRA:SGJC: Tax Jurisdiction ID. Allow to control and configure the used ID instead of the using 'Default'

DMW-2323 CORE: add IsTaxExemption order level indication

DMW-2322 SFRA:SGJC: rework product tile caching approach

Release 21.0.2

 Date: August 2022

Bug

DMW-2327 CORE:SFRA:SGJC: Bundle products cannot be added to the basket with Fixed Price Country

DMW-2312 CORE: product availability issue

DMW-2304 CORE:SFRA:SGJC: product option promotion fix

DMW-2296 CORE: Send the right value of 'isBundle' flag in SendCart request for regular and options products.

DMW-2287 CORE: OCAPI basket hash

DMW-2230 CORE: move "geTotalDutiesPaidByCustomerPrice" order custom attribute to the "General" group

DMW-2220 CORE: coupon code application issue

New Feature

DMW-2073 CORE: Restricted Items Feed

Task

DMW-2295 CORE: Send the unique product name for option products

DMW-2285 CORE: Update the documentation 'Global-e Restricted Forbidden Products'

DMW-2268 CORE:SFRA:SGJC: Improvement of Price Conversion on the client side.

DMW-2240 CORE: Global-e custom statuses handling

DMW-2215 CORE:SGJC: Client side JS. Redirect to the same page.

DMW-2213 SFRA:SGJC: product EstimatedDeliveryDate

DMW-2211 CORE: disable JWT for shipping details API

DMW-2198 CORE: 'GlobaleCatalogFeed' job. Process categories of Variation Group Product.

DMW-2174 CORE: SFCC job 'GlobaleProducts'(GE restrictions). Add handling of broken products.

DMW-2173 CORE: Update GE cartridges metadata

Release 21.0.1

 Date: June 2022

Bug

DMW-2146 CORE: culture issue on country switch

DMW-2141 CORE: Fixed prices. Price Error with old compatibility mode

DMW-2138 SFRA: Incorrect Price is displayed on PLP/Search Page for Product Bundle

DMW-2125 CORE: Fix array find error

DMW-1998 CORE: non-Latin characters encoding issue

DMW-1204 CORE:SFRA:SGJC: Remove Global-e GET parameters from URL when a country is changed

Task

DMW-2147 CORE: move site prefs to platform settings

DMW-2142 CORE: validate cart using customer basket

DMW-2140 CORE: add CashOnDeliveryFee (Merchant Currency)

DMW-1679 CORE: GlobaleCatalogFeed refactoring

Release 21.0.0

 Date: May 2022

Bug

DMW-2125 CORE: Fix error from logs for "getSetOfStringsPreferenceMapVal" function

DMW-2112 CORE:SFRA:SGJC: 'geCartItemid' is not filled for product line item (bundles)

Improvement

DMW-2107 CORE: ShippingDetails API refactoring

DMW-2096 CORE:SFRA:SGJC: SendCart refactoring

DMW-2092 CORE:SFRA:SGJC: Validate cart refactoring

DMW-2077 CORE:SFRA:SGJC: SOTM refactoring

DMW-2090 CORE:SFRA:SGJC: Refund notification refactoring

DMW-2089 CORE:SFRA:SGJC: Update Shipping Status refactoring

DMW-2086 CORE:SFRA:SGJC: Order Status Update refactoring

DMW-2085 CORE:SFRA:SGJC: RMA refactoring

DMW-2057 CORE:SFRA:SGJC: Globale Client Side JS. New Architecture

DMW-2093 CORE: cartHelpers refactoring

New Feature

DMW-2075 CORE: orders in customer currency

DMW-1992 CORE: JWT protection

DMW-956 CORE: implement support for product options

Task

DMW-2123 CORE: OCAPI locale GET parameter

DMW-2113 CORE: order cancellation reason code

DMW-2087 CORE: update SFCC custom cache

DMW-2074 CORE: Site preference to pass HubId in SendCart HubId

DMW-1821 CORE: VATExemptionDisabled feature

Release 20.8.1

 Date: March 2022

Bug

- DMW-2047 CORE: 'OriginalDiscountValue' is sent 'null' in SendCart event if ProductLineItems Discounts exist
- DMW-1998 CORE: non-Latin characters encoding issue
- DMW-1699 CORE: VAT Rate rounding issue

New Feature

- DMW-2035 CORE: Shipping Details API
- DMW-718 CORE:SFRA:SGJC: GE popups without GE checkout
- DMW-1787 CORE:SFRA:SGJC: Implement Gift Cards and Loyalty Points features

Task

- DMW-2070 CORE: order source indication
- DMW-2055 CORE: discount name logic
- DMW-2011 CORE: currency mapping for dynamic countries
- DMW-2010 CORE: WYOL tracking details (UODv2)
- DMW-2008 CORE: additional SOTM D&T subsidy attributes
- DMW-2007 SFRA:SGJC: checkout redirect on empty basket
- DMW-1972 CORE:SFRA:SGJC: PaymentNotification refactoring
- DMW-1971 CORE: Set 'currencyCode' directly into GlobaleInit
- DMW-1969 CORE: add "TotalDutiesPaidByCustomerPrice" order custom attribute
- DMW-1965 CORE: remove redundant restoreBasket logic
- DMW-1964 CORE:SFRA:SGJC: OrderClientCreate refactoring
- DMW-1866 CORE: Update search of product attribute by site preference key.
- DMW-1833 CORE: SFCC jobs. Update metadata and documentation.
- DMW-1817 CORE: Custom preference for custom PLI attributes
- DMW-1217 CORE: promotion discount taxation (SFCC setting)
- DMW-955 CORE:SFRA:SGJC: Currency conversion within content asset, slots, promotion callout msg

Release 20.8.0

 Date: February 2022

Bug

- CORE: product level amount discount issue
- SFRA: promotion callout message issue
- CORE:SFRA:SGJC: unit test fixes
- CORE: VAT Rate rounding issue
- SGJC: 'Order Subtotal' calculation
- CORE: incorrect price formatting
- CORE: incorrect UnitSalePriceBeforeRounding value for fixed price countries

New Feature

- CORE:SFRA:SGJC: Place SFCC order on Payment Update from Global-e
- CORE:SFRA:SGJC: apply coupon in GE checkout
- CORE:SFRA:SGJC: customer registration
- CORE: custom SFCC cache enabled by default
- CORE: SFCC Bundles support

Task

- CORE: SFCC jobs. Update metadata and documentation.
- CORE:SFRA:SGJC: unit tests
- CORE: code field in catalog export job config
- CORE: add cityRegion address custom attribute
- CORE:SFRA:SGJC: Add default error responses for Global-e API calls
- SFRA: Route changing for displaying of Product Details Page
- CORE: multiple domains for one site
- CORE: checkout culture mapping
- CORE: SFCC to GE shipping refund notification
- CORE: Catalog feed. Add 'unit' attribute for configuration of 'weight' value

Release 20.7.4

 Date: September 2021

Bug

- Fixed issue with product set PDP
- Fixed issue with incorrect calculation of order-level discounts for the case with checked 'geDoNotConvert' promotion attribute
- Fixed issue with a promotional price on PLP/Search Page (SFRA)
- Fixed issues in Order Details Page (SFRA, SGJC)
- Fixed issue with incorrect price formatting
- Fixed issue with incorrect price displayed for product tile with fixed price books
- Fixed issue with geTotalProductsNetPrice negative value
- Fixed issue with bonus product with fixed price
- Fixed issue with SFCC to Global-e refund notification
- Fixed issue with fixed price book configuration

New Feature

- Implemented RMA (SendRMAInfoToMerchant API and UpdateRMA API) feature that allows to generate internal RMA number instead of using Global-e one
- Implemented shipping cost on order level (allows to store shipping cost in merchant base currency to order system attribute)
- Implemented logic to support SFCC bundle products

Task

- Added VATRegistrationNumber and CustomerTaxId order custom attributes
- Added MerchantShippingVATRate order custom attribute
- Added SFCC custom hook to Global-e SendCart.UrlParameters API
- Added SFCC custom hook before SendCart API request
- Improved logic for price books configuration
- Improved logic for catalog export job
- Added support of SFCC analytic reports for Global-e checkout
- Updated logic for 'GlobaleUpdateOrderDispatch' job (added 'Quantity' value to 'Exception')
- Updated documentation and metadata

Release 20.7.3

 Date: June 2021

Bug

- Fixed issue with Incorrect rounding for prices with 0 decimal places
- Fixed issue with order history PLI total (SFRA)
- Fixed issue with showing order history amounts in customer currency (SGJC)
- Fixed issue with range price on PLP/Search result pages (SFRA)
- Fixed issue with wrong prices if no currency rate
- Fixed issue with multiple currencies in one job step
- Fixed issue with PLI geCartItemid and position with discounts
- Fixed issue with N/A total price
- Fixed issue with wrong discounts calculation for the products with fixed prices

Task

- Implemented SFCC Order number generation before SendCart request
- Implemented OrderClientCreate extended error handling
- Implemented configurable host value in the 'ProductURL' field of 'GlobaleCatalogFeed' job
- Removed 'geMerchantCountryCode' fallback from SitePreference_geCatalogFeedConfig
- Added CartValidation (stock validation) documentation
- Added Global-e SFCC Integration Requirements documentation
- Added 'OrderDocuments' to SFCC Order custom attributes
- Added USSalesTax and USSalesTax International Order custom attributes
- Added custom hooks to triggered by Global-e events

Release 20.7.2

 Date: April 2021

Bug

- fixed issue with order price adjustments on order recreation from a new basket
- fixed issue with locale data when there is no "en" locale on the SFCC side
- fixed issue with keep-alive requests which cause redirect to cart page
- promotion fixes (total fixed price, amount promotion)

Task

- product categories in SendCart and catalog export feed
- price books configuration (dynamic pricing)

Release 20.7.1

 Date: February 2021

Bug

- fixed issue with free product discount
- fixed issue with percentage product discount
- fixed issue with free shipping discount
- fixed issue with a shipping VAT rate
- fixed issue with a destination VAT rate

New Feature

- implemented fixed price books logic which allows having more than two fixed price books
- implemented Cart Validation check before an order is created on Global-E and SFCC sides

Task

- product variation attributes were moved to metadata (SendCart payload)
- Global-e client settings were moved from the SFCC session
- added default OrderStatusReason (order refund notification)
- added site preference which allows overriding Global-e culture code on country level
- updated documentation and metadata

Release 20.7.0

 Date: December 2020

Bug

- fixed an issue with order level custom attributes "geIsFreeShipping" and "geFreeShippingCouponCode"
- fixed an issue with the wrong "PreferredCultureCode" SendCart payload property
- fixed an issue with uploading catalog export feed to an SFTP
- fixed an issue with "glCurrency" GET parameter for fixed price countries

New Feature

- implemented extended price formatting (DecimalSeparator, ThousandSeparator)

Task

- added Global-E shipping methods
- updated promotion calculation logic
- updated Global-E logger logic
- updated order notes logic
- update "GlobaleCatalogFeed" job logic (added additional job step parameters)
- updated "GlobaleSettings" job
- updated KeepAlive logic
- added product limit for GlobaleCatalogFeed job
- updated documentation and metadata

Release 20.6.0

 Date: November 2020

Bug

- fixed an issue with Global-E custom caches configuration
- fixed an issue with fixed price promotions
- fixed an issue when address is not saved for logged in customer

Task

- updated implementation of the GlobaleCreateOrderRefund, GlobaleUpdateOrderDispatch, GlobaleUpdateOrderStatus jobs
- updated implementation of basket/order notes handling
- added support of percentage order-level promotion with qualifying/excluded products
- added new job "GlobaleProducts" to pull product-related data from Global-E
- updated order flow
- updated cartridge metadata
- updated cartridge documentation

Release 20.5.0

 Date: July 2020

Bug

- fixed an issue with exclude/include price books configuration
- fixed an issue with product SKU in case it contains special characters
- fixed an issue with coupon application for not qualified product

New Feature

- Implemented support of percentage discount (Order class, amount thresholds)
- Implemented order creation flow on SOTM request (BEFORECHECKOUT and AFTERCHECKOUT flows are removed)

Task

- updated document - Release Notes
- updated document - Catalog Export Job
- updated document - Metadata
- updated document - Promotions
- added delta mode to Catalog Export Job
- updated dynamic country redirect URL logic
- added handling of new properties "CustomerVATRate", "InternationalDiscountedPriceInMerchantCurrency", "ShippingVATRate"
- added handling of new property "AllowDirectCommunicationFromMerchant"

Release 20.4.1

 Date April 2020

Bug

- fixed an issue with custom objects cache "defaultVATRateType"

Release 20.4.0

 Date April 2020

Bug

- fixed an issue with bonus product promotions based on thresholds
- fixed an issue with multiple discounts with type TYPE_TOTAL_FIXED_PRICE
- fixed an issue with country redirect URL using "default" locale
- fixed an issue with basket not restored for before checkout order creation flow on Pipelines
- fixed an issue with rounding of order custom attribute "geTotalProductsNetPrice"

New Feature

- implemented support of excluded fixed price books for specific countries
- implemented custom caching for Global-E custom objects
- implemented support of price conversion in jobs (site context)

Task

- updated document - Release Notes
- updated integration guide document
- updated production readiness assessment document
- updated cartridge metadata document
- added new document, describes how to configure excluded fixed price books feature for specific countries
- added new document, describes how to configure GlobaleSettingsJob for different SFCC instances
- added new document, describes the flow on SFCC to Global-e updates (status / refund / dispatch)
- added new metadata document globale.jobs.production.xml
- added new decorator to make it possible to pre-populate customer's email on guest checkout scenario
- added unit tests for overridden SFCC models
- added integration tests
- added log messages filtering for Global-e services
- added "AllowSMSFromMerchant" handling
- added the RefArchGlobalMetadata.zip file which could be used to import all the Global-e metadata using site import

Release 20.3.0

 Date: March 2020

Bug

- fixed an issue with Global-E discount name in SendCart call
- fixed an issue with products that have zero price
- fixed an issue with order payment when a customer is redirected to 3rd party hosted payment page (an order could be paid even if it was failed previously)
- fixed an issue with resources (added missing translations)
- fixed an issue with the wrong VAT rate for price adjustment in some cases
- fixed an issue with recursion in a recentProductCountryS job step
- fixed an issue with mini-cart product prices (prices are not recalculated when customer changes country/currency)

New Feature

- Global-E currency settings (space between currency symbol and amount, currency symbol before/after amount)
- implemented support of included price books for specific countries

Task

- updated document, describes the configuration for Promotions based on threshold
- updated document - Release Notes
- updated integration guide document
- replace deprecated md5 algorithm with sha256 in cart hash generation
- add BasketSnapshot debug logging
- Client SDK metadata update
- added new custom hook "globale.onGlobaleInit" which is called when a customer's country/currency is set/changed
- added custom caching for Global-E country objects to improve performance
- added new document, describes how to configure included price books feature for specific countries
- added new custom hook "globale.onGlobaleConfirmOrder" which is called when an order is confirmed by Global-E
- added new parameters to the recentProductCountryS job step to be able to configure different merchant GUID and base API URL
- Client SDK update (JS SDK loads from a different source)

Release 20.2.0

 Date: 04 Feb 2020

Bug

- Fixed an issue when a page is refreshed only if Country is changed in Global-e Country Switcher, but not refreshed when Currency is changed
- Fixed an issue when a page is refreshed only if Country is changed in Global-e Country Switcher, but not refreshed when Currency is changed

New Feature

- Implemented support of promotions based on thresholds (new Promotion custom attributes)
- Implemented new flow for Order Create (configurable in GLOBALE Site Preferences). SO now Merchant will be able to decide whether to use the old Order Create flow, when SFCC Order is being created in the end of Global-e Checkout, or new flow - when SFCC Order is being created right before Global-e Checkout page is rendered (in CREATED status).

Task

- Updated Global-e cookie initialization according to the latest changes in Salesforce B2C Commerce Cloud and major Browsers
- Added new document that describes the configuration for Promotions based on threshold
- Changed the name for some documents, following the naming convention
- Added new document - Release Notes
- Added standard SFCC SFRA flags to Global-e SFRA solution, so if Merchant has removed it - it will be kept in Global-e cartridge(s)
- Changed the time interval for KeepAlive call 30 => 10 seconds
- Added new demo for Promotions based on thresholds
- Added standard SFCC SiteGenesis flags to Global-e SiteGenesis solution, so if Merchant has removed it - it will be kept in Global-e cartridge(s)
- Changed the time interval for KeepAlive call 30 => 10 seconds
- Added new demo for Promotions based on thresholds

Release 19.11.1

 Date: 18 Nov 2019

Bug

- Fixed issue with min/max Price for variant
- Fixed issue with Global-e ShippingMgr Class
- Fixed issue with Rate Limit for Global-e Service (metadata)
- Fixed issue with price before rounding for fixed price countries
- Fixed typo in refundNotification.js decorator (Job)
- Fixed issue with applying and recalculating Product and Order level discounts. When Order is created in SFCC, it is not possible to trigger PromotionMgr.applyDiscounts() for Order
- Fixed issue with taking the product class properly for ProductClassCoefficient rate calculation

New Feature

- Implemented Global-e Order Replacement
- Implemented Shipping Subsidy (received in SendOrderToMerchant) as a custom attribute of SFCC Order

Task

- Improved defaultShippingMethod.js decorator of globale/checkout model, shippingMethod.js decorator of globale/order model
- Replaced Array.slice.call to Array.prototype.slice.call. This change should not bring any regression, since slice was used with only one parameter - arguments
- Updated documentation and metadata
- Added minified client js sdk source path to metadata
- Added forceWrite parameter to orderNotes.js decorator, so the Order notes (if forceWrite = true) will be written despite what is set in GLOBALE Site Preferences
- Added new Global-e 2018 Logo (logo_2018.png) image
- Removed SearchReindex step from GlobaleSettings job (metadata), so the job will be running much faster and won't affect on performance. When the SearchReindex is needed - it should be ran/added manually
- Set initial customer name (Guest Guest) for Basket if it's not there (Registered and Guest customers), will be updated when SOTM will come
- Response status code = 200 for Order Client Create even if it's failed (otherwise it is not possible to read the error in Global-e Admin Logs)
- Updated path to Global-e model decorators (globale/[model]/[decorator] => globale/[model]/decorators/[decorator])
- Added document about Product/Country Coefficient Rate
- Added one more demo metadata file - taxation for US Global-e Merchants
- Moved all architecture-free models and scripts to int_globale cartridge
- Improved checkout/shippingHelpers.js
- Replaced Array.slice.call to Array.prototype.slice.call. This change should not bring any regression, since slice was used with only one parameter - arguments
- Added new demo metadata file for content slots
- Created one cartridge for Global-e core functionality - int_globale, which can be used for any storefront architecture integrations (SiteGenesis Pipelines/Controllers and SFRA). The architecture related changes now should be placed only to architecture extension cartridge (int_globale_sitegenesis - for SiteGenesis/Pipelines, int_globale_sfra - for SFRA only)

- Improved npm commands: "npm run compile", "npm run lint", "npm run uploadCartridge" can be used for all or architecture-related cartridges
- Moved Global-e Jobs in int_gloable cartridge
- Improved CartModel.js
- Replaced Array.slice.call to Array.prototype.slice.call. This change should not bring any regression, since slice was used with only one parameter - arguments
- Added new demo metadata file for content slots

Release 19.10.3

 Date: 14 Oct 2019

Bug

- Fixed issue in calculate.js (bonus product line item)

New Feature

- Implemented DutiesAndTaxesSubsidy to SendOrderToMerchant

Task

- Compiled static css and js files, so they can be used as a basis for new integrations
- Set default (Global-e) shipping method to Basket before sending sendCart
- Compiled static css and js files, so they can be used as a basis for new integrations

Release 19.10.2

 Date: 09 Oct 2019

Bug

- Fixed typo in Global-e model priceRefinementValue/displayValue.js
- Fixed issue with 0 valueFrom/valueTo in priceRefinementValue/displayValue.js
- Fixed SFCC bug in suggestions.isml
- Fixed issue when missing guard.js, object.js or Browsing.js
- Fixed issue when OriginalListPrice is always the same as OriginalSalePrice, and as a result, end-customer List Price also the same as end-customer Sale Price (if no discount)

New Feature

- Added new custom session property - 'geCountryName'

Task

- Improved Global-e Country Switcher: now it will be located in the same position with using the same style/view as the standard SFRA country/locale switcher
- Improved Globale-Cache controller: 'template' parameter is changed to 'globaletemplate'. Added new parameter - 'globalecache=true' if the target template should be recached with glCountry/glCurrency
- Improved Global-e models: Money, PriceModel
- Improved calculate.js
- Improved Product class, removed getListPrice method from priceModel and added it to globaleHelpers.js
- Added one more check for shipping method in cartHelpers.js
- Added origFormat parameter to money/toString() model, so by default it will return formatted money (not like in SFCC dw.value.Money), and if origFormat == true - it will return as original SFCC dv.value.Money.toString()
- Improved Globale.js controller (checkout/order models), using standard SFCC API request/response objects instead of controller's req/res, so the models can be used not only for SFRA but for SiteGenesis as well
- Added defaultShippingMethod() to checkout model, which will check and set Global-e default shipping method, configured in Site Preferences (+ custom based on Basket currency), if it's not set in Basket yet
- Removed min/max price lookup for list/standard fixed price country prices, because in standard SFCC min/max price lookup only sale price is used
- Improved scripts/app.js
- Improved product/GetProductDetailUrl.ds: exported functions module.exports
- Added a bit more DEMO coupon codes and promotions to metadata
- Improved Cart.js, COShipping.js controllers
- Added customized COShipping.xml pipeline for version based on SiteGenesis Pipelines
- Updated SiteGenesis "Global-e SFCC Cartridge Installation Guide.docx"
- Improved GlobaleCache, GlobaleCheckout, GlobaleOrder, GlobalePricing, GlobaleSendCart controllers
